01 MAKE YOUR LIFE MORE GREEN - MIT JANGAL MOSS

Nature is my home

Strong green tones, a special surface and a calming aura - our moss panels are the ideal solution for creating a beautiful and calm room climate.

We use high-quality moss for our moss panels. In addition to their natural appearance, they are particularly convincing because they are easy to care for: they require neither a special light source, nor watering or applying fertiliser. This means that there are no additional costs for the maintenance of this evergreen wall design

The low installation height and quick assembly also make our moss panels the perfect design element for wall design. So how about a new look for the kitchen and the rest of the house? Create special room accents that not only create a natural atmosphere in the room, but also ensure relaxation and peace. With our moss panels, there are no limits to your imagination when it comes to wall design.

O2 WE LOVE MOSS

Healthy living and sustainability play a significant role in our production.

For our moss panels, we only use naturally grown moss that has been carefully selected and mined in sustainably managed regions. The moss is gently picked by hand and cleaned using a special process to make it permanently durable. As a result, our moss panels retain their natural appearance even after many years. We refrain from using ingredients that are harmful to health and deliberately rely on tested quality. We use recycled PET as the basis for our moss panels. In this way, we reduce plastic waste and save CO₂ during production, which also protects the environment. Thanks to these healthy and environmentally friendly properties, our moss panels invite you to feel good.

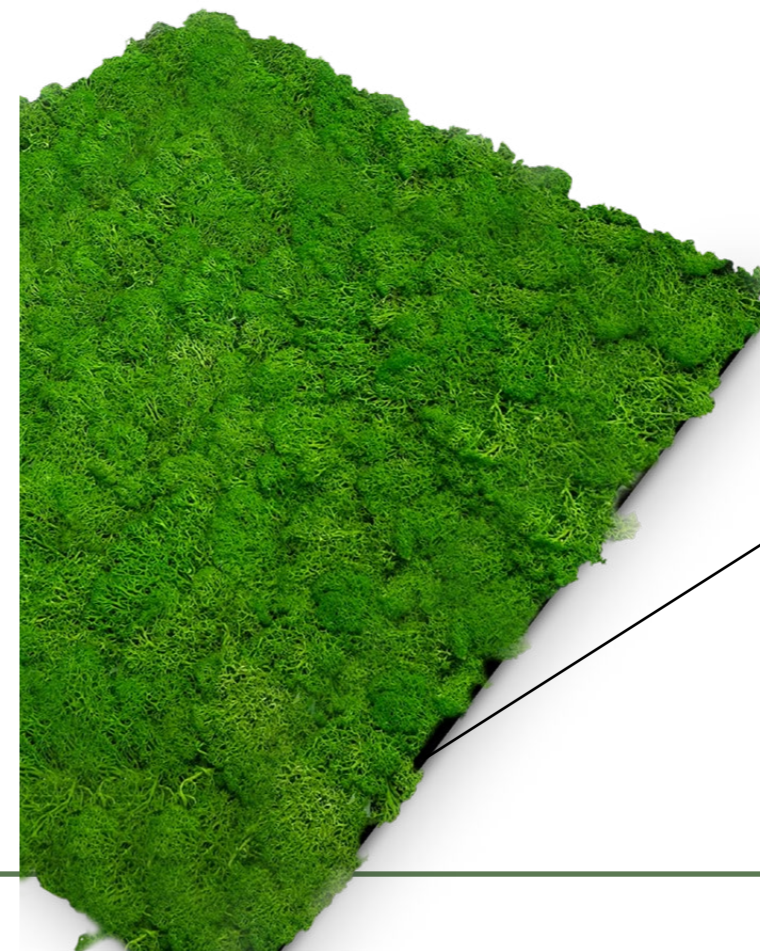

Nature is the purest portal to inner peace

But our moss panels are not only convincing with regard to the environment. They offer many benefits for your own health. Our moss panels have a calming, relaxing and soothing effect. Both the natural green of the moss panels and the special feel have a positive effect on us humans. But also through the reduction of sound in rooms as well as the regulation of the room climate, stress is minimised, creativity and productivity are increased and well-being is improved. See for yourself and enjoy all the advantages of our moss panels.

-  Sustainable wall greening
-  Improving well-being
-  Comfortable room acoustics
-  Increasing creativity and productivity
-  Improving the indoor climate

PET AKUSTIKFILZ

Our 6 mm thick acoustic felt is made of recycled PET. This means that we can not only reduce plastic waste with our products, but also save CO₂ during production. This in turn saves energy and additionally protects the environment.

03 MODULAR WALL MOSS

Decorating your home in a beautiful and healthy way has never been easier than with our moss panels. Whether as a large moss wall or as an individual moss element - the size of 52 x 52 cm is particularly practical, catches the eye and looks extremely attractive. Thanks to the wide range of possible uses, there are no limits to creativity. As they are also suitable for damp rooms such as kitchens and bathrooms, they can be installed in any room. Thanks to the simple installation, this can also be done by yourself. The low installation height makes the panel ideal for wall decoration. Depending on the size of the area to be decorated, this can be done in a short time. For installation, our moss panels can either be screwed or glued. *

FORMAT 520 x 520 mm

11100 Nature Green

11101 Rich Green

11102 Bright Green

11103 Dark Green

What are you waiting for? Bring nature into your home!

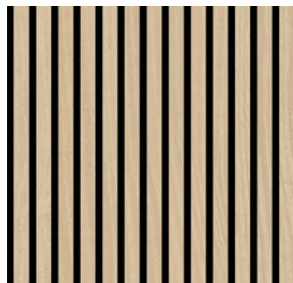

*You can find the assembly instructions on our website jungal.eu/en/downloads

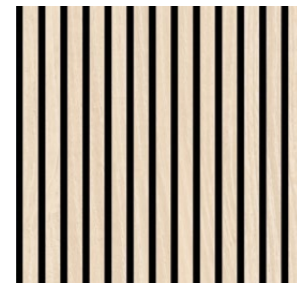

04 COMBINATION WITH MODULAR WALL INTELLIGENT ACOUSTIC PANEL

An absolute eye-catcher is a combination with Modular Wall Smart Acoustic Panel. Modular Wall offers a great opportunity to mount the panels vertically or horizontally and to use different formats and colours from the series. With our Modular System, countless wall design options are open to you.

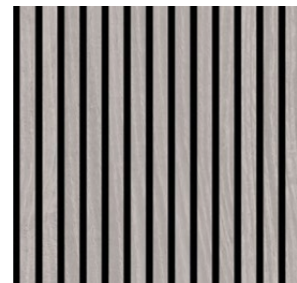

FORMAT 520 x 520 mm

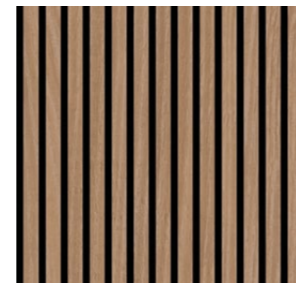

11000A Fanal Oak

11001A Lefea Oak

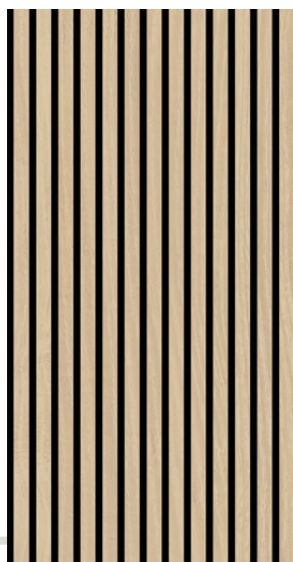

11002A Oulanka Oak

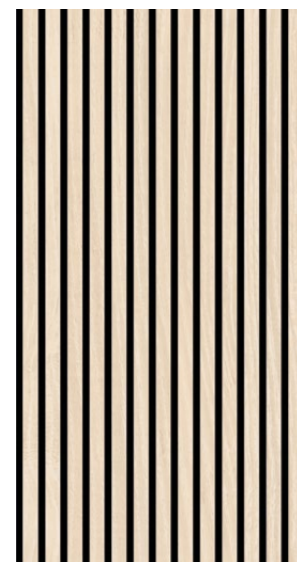

11003A Davert Oak

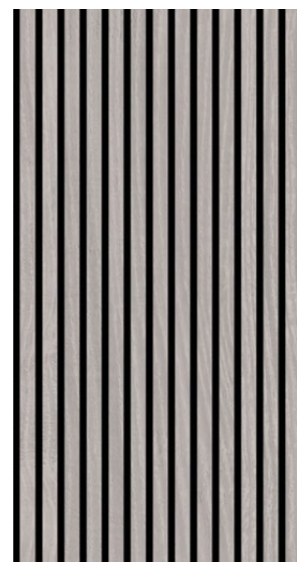

FORMAT 1.040 x 520 mm

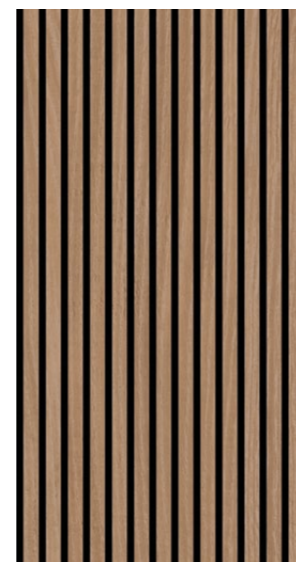

11000B Fanal Oak

11001B Lefea Oak

11002B Oulanka Oak

11003B Davert Oak

Product design **protected** throughout **Germany** by utility model.

A **European patent** is **pending** for product structure.

Decorative layer (moss)
PET felt 6 mm

Real wood 1 mm
PET felt 9 mm

The acoustic panels from JANGAL have a special feature compared to other products: the specially developed connector allows them to be fitted over the entire height of the wall without visually disturbing joints. This makes seamless transitions possible, resulting in an aesthetically pleasing overall appearance.

Design protected **EU-wide** by registered design.

System protected in Germany by utility model.

European patent pending for the system and method of arrangement.

Exclusive only from JANGAL
