SOLID ACOUSTIC PANEL

Now available in
the new format
1,206 x 800 mm!

MORE THAN JUST AN ACOUSTIC PRODUCT

Acoustic panels from JANGAL are more than just sound absorbers. They are a decorative element in wall and ceiling design and are absolutely trendy. Areas of rooms can be visually highlighted and framed quickly and easily with little effort. The panels can be combined in color and, thanks to their structure, adapt to any space. Both small and large areas in the kitchen, living room, children's room and bedroom can be covered in an instant and serve both for decoration and acoustics.

For installation, the acoustic panels can be either screwed or glued with a solvent-free assembly glue.*

* You can find the assembly instructions on our website jangal.eu/en/downloads/

TAKING RESPONSIBILITY THROUGH THE USE OF SUSTAINABLE MATERIALS

In addition to perfect room acoustics as well as room design, the aspect of sustainability is particularly important to us. Therefore, we at JANGAL attach particular importance to the use of sustainable materials in production. Thereby we guarantee not only sustainable, but also healthy living and living in your own four walls.

MDF

Our 12mm MDF board is a fiberboard. The wood we use comes from sustainable forestry. We thus ensure that only as much wood is removed as can be permanently regrown. This is certified by the FSC seal.

PET ACOUSTIC FELT

Our 9 mm thick acoustic felt is made of recycled PET. This way we can not only reduce plastic waste with our products, but also save CO₂ during production. This in turn saves energy and additionally protects the environment.

REAL WOOD VENEER

The real wood veneer also comes from responsibly sustainable forestry. It cares for a natural look and gives the acoustic panels the finishing touches.

THE CONNECTOR WITH A „WOW“ EFFECT

Compared to other products, the acoustic panels from JANGAL have a special feature: the specially developed connector allows installation over the entire height of the wall without visually disturbing joints. This makes seamless transitions possible, resulting in an aesthetically pleasing overall appearance.

-  Design registered EU-wide.
-  The system is protected by utility model in Germany.
-  A European patent is pending for the system and method of arrangement.

Exclusively available only at **JANGAL**

SOLID ACOUSTIC PANEL

FORMAT 1,206 x 800 x 22 mm

10013 Walnut

10014 Silver Oak

10015 Nature Oak

10016 Teak

10017 Classic Oak

The new Solid Acoustic Panel made of high-quality MDF slats impresses with its practical format. With a size of 1,206 x 800 mm, the panels are easier to handle and even more creative in design. Even lower room elements such as kitchen counters can be designed without much sawing effort.

Improvement of the quality of living

Rooms with bad acoustics often seem uncomfortable. The problem can be counteracted with the acoustic panels from JANGAL. The materials used for the panels, as well as the lamellar structure, absorb the noise created, thus creating pleasant room acoustics and a stylish room experience at the same time.

Individual design and customization

Whether as a large-scale wall or ceiling covering or as a stylish and decorative element - the acoustic panels from JANGAL can be designed and installed according to your own ideas.

Increase of the sense of well-being

Noise in homes affects health and often leads to difficulty concentrating and problems with speech intelligibility. Our acoustic panels eliminate these problems and optimize the health of the home.
