More than just an acoustic product

Acoustic panels from JANGAL are more than just sound absorbers. They are a decorative element in wall and ceiling design and are absolutely trendy. Areas of rooms can be visually highlighted and framed quickly and easily with little effort. The panels can be combined in color and, thanks to their structure, adapt to any space. Both small and large areas in the kitchen, living room, children's room and bedroom can be covered in an instant and serve both for decoration and acoustics.

For installation, the acoustic panels can be either screwed or glued with a solvent-free assembly glue.*

* You can find the assembly instructions on our website jangal.eu/en/downloads/

“ Home is not just a place. Home is a very special feeling.

Taking responsibility through the use of sustainable materials

In addition to perfect room acoustics as well as room design, the aspect of sustainability is particularly important to us. Therefore, we at JANGAL attach particular importance to the use of sustainable materials in production.

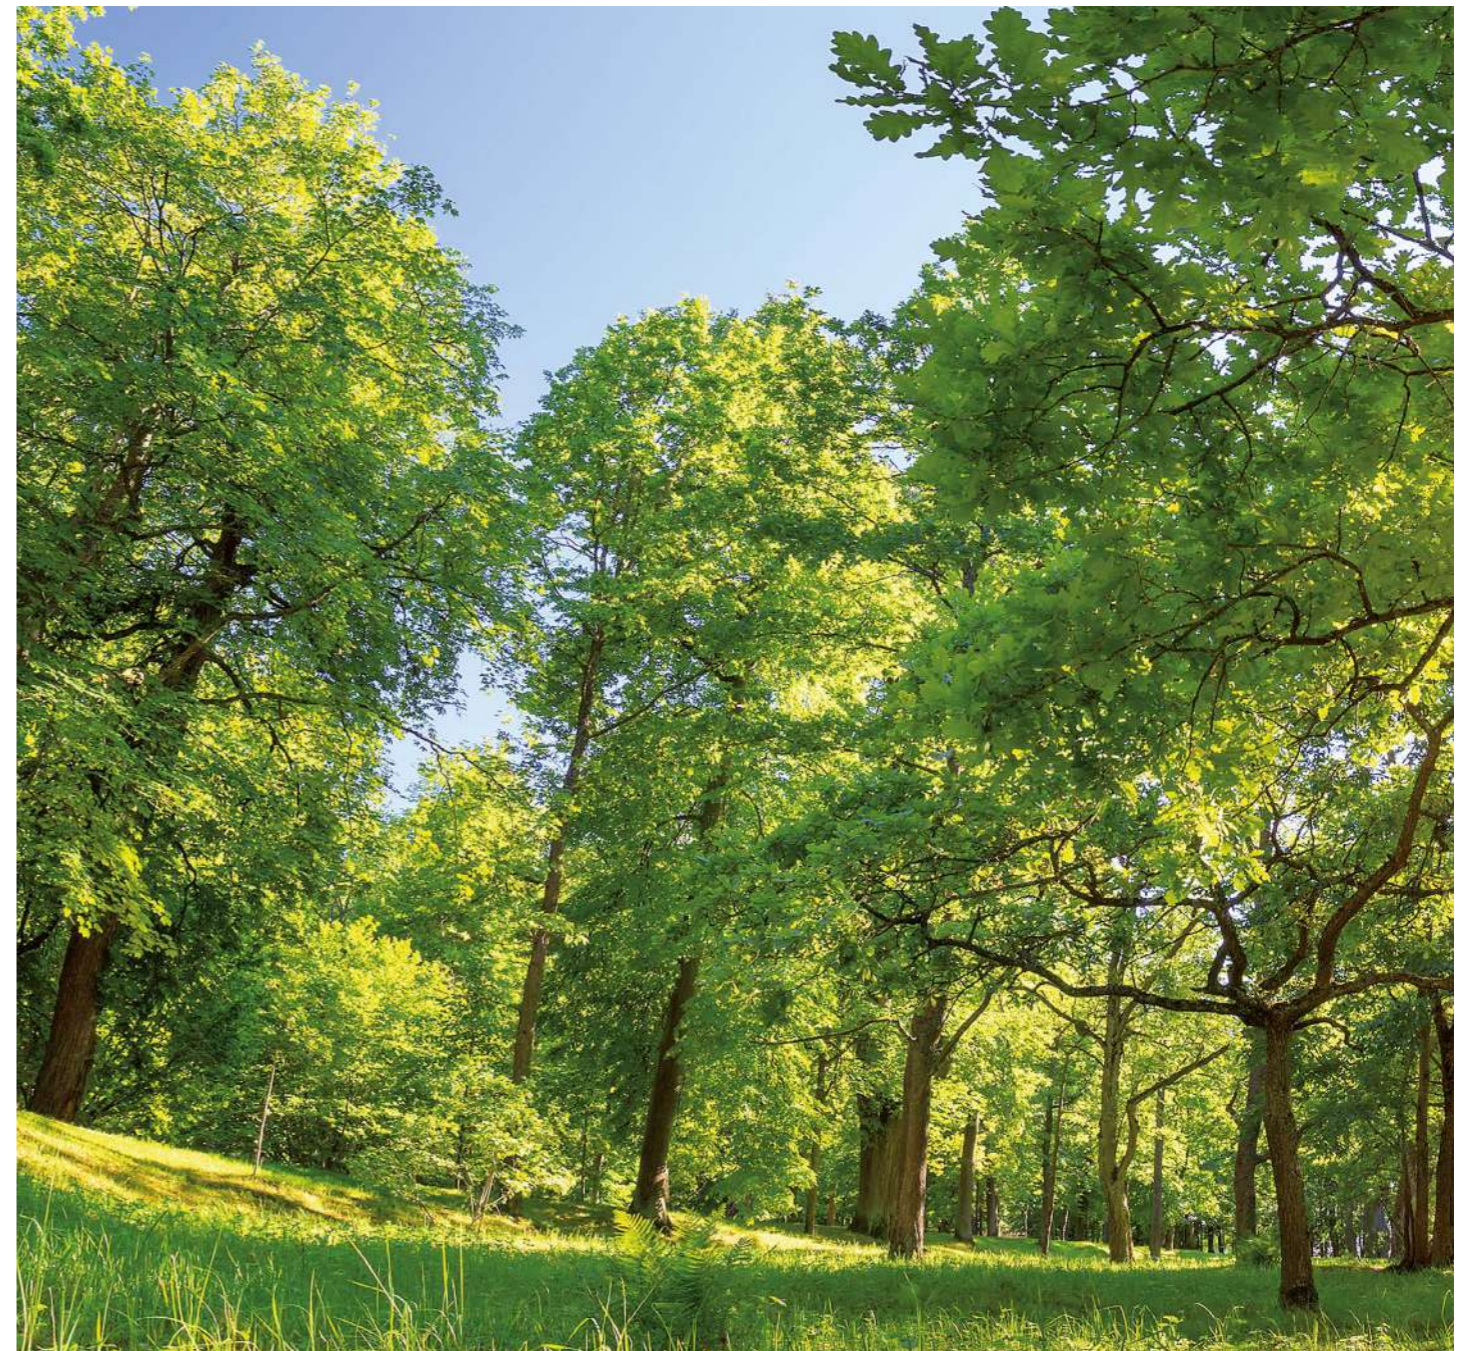

This is why our 9 mm thick acoustic felt is made of recycled PET materials and the wood we use comes from sustainable forestry. Thereby we guarantee not only sustainable, but also healthy living and living in your own four walls.

More sustainability with recycled PET

Up to 12 million tons of plastic waste end up in our oceans every year.* We at JANGAL therefore want to make a contribution to the environment and use recycled PET for our acoustic felt. This way we can not only reduce plastic waste with our products, but also save CO₂ during production. This in turn saves energy and additionally protects the environment.

* Quelle: <https://www.wwf.de/themen-projekte/plastik/plastikmuell-im-meer/fragen-und-antworten-zu-plastikmuell>

Support for sustainable forestry

All the wood we use comes from responsibly managed forests. We thus ensure that only as much wood is removed as can be permanently regrown. This is certified by the FSC seal.

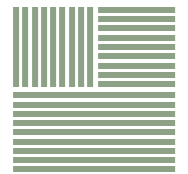

For more living quality, individuality and well-being

Improvement of the quality of living

Rooms with bad acoustics often seem uncomfortable. The problem can be counteracted with the acoustic panels from JANGAL. The materials used for the panels, as well as the lamellar structure, absorb the noise created, thus creating pleasant room acoustics and a stylish room experience at the same time.

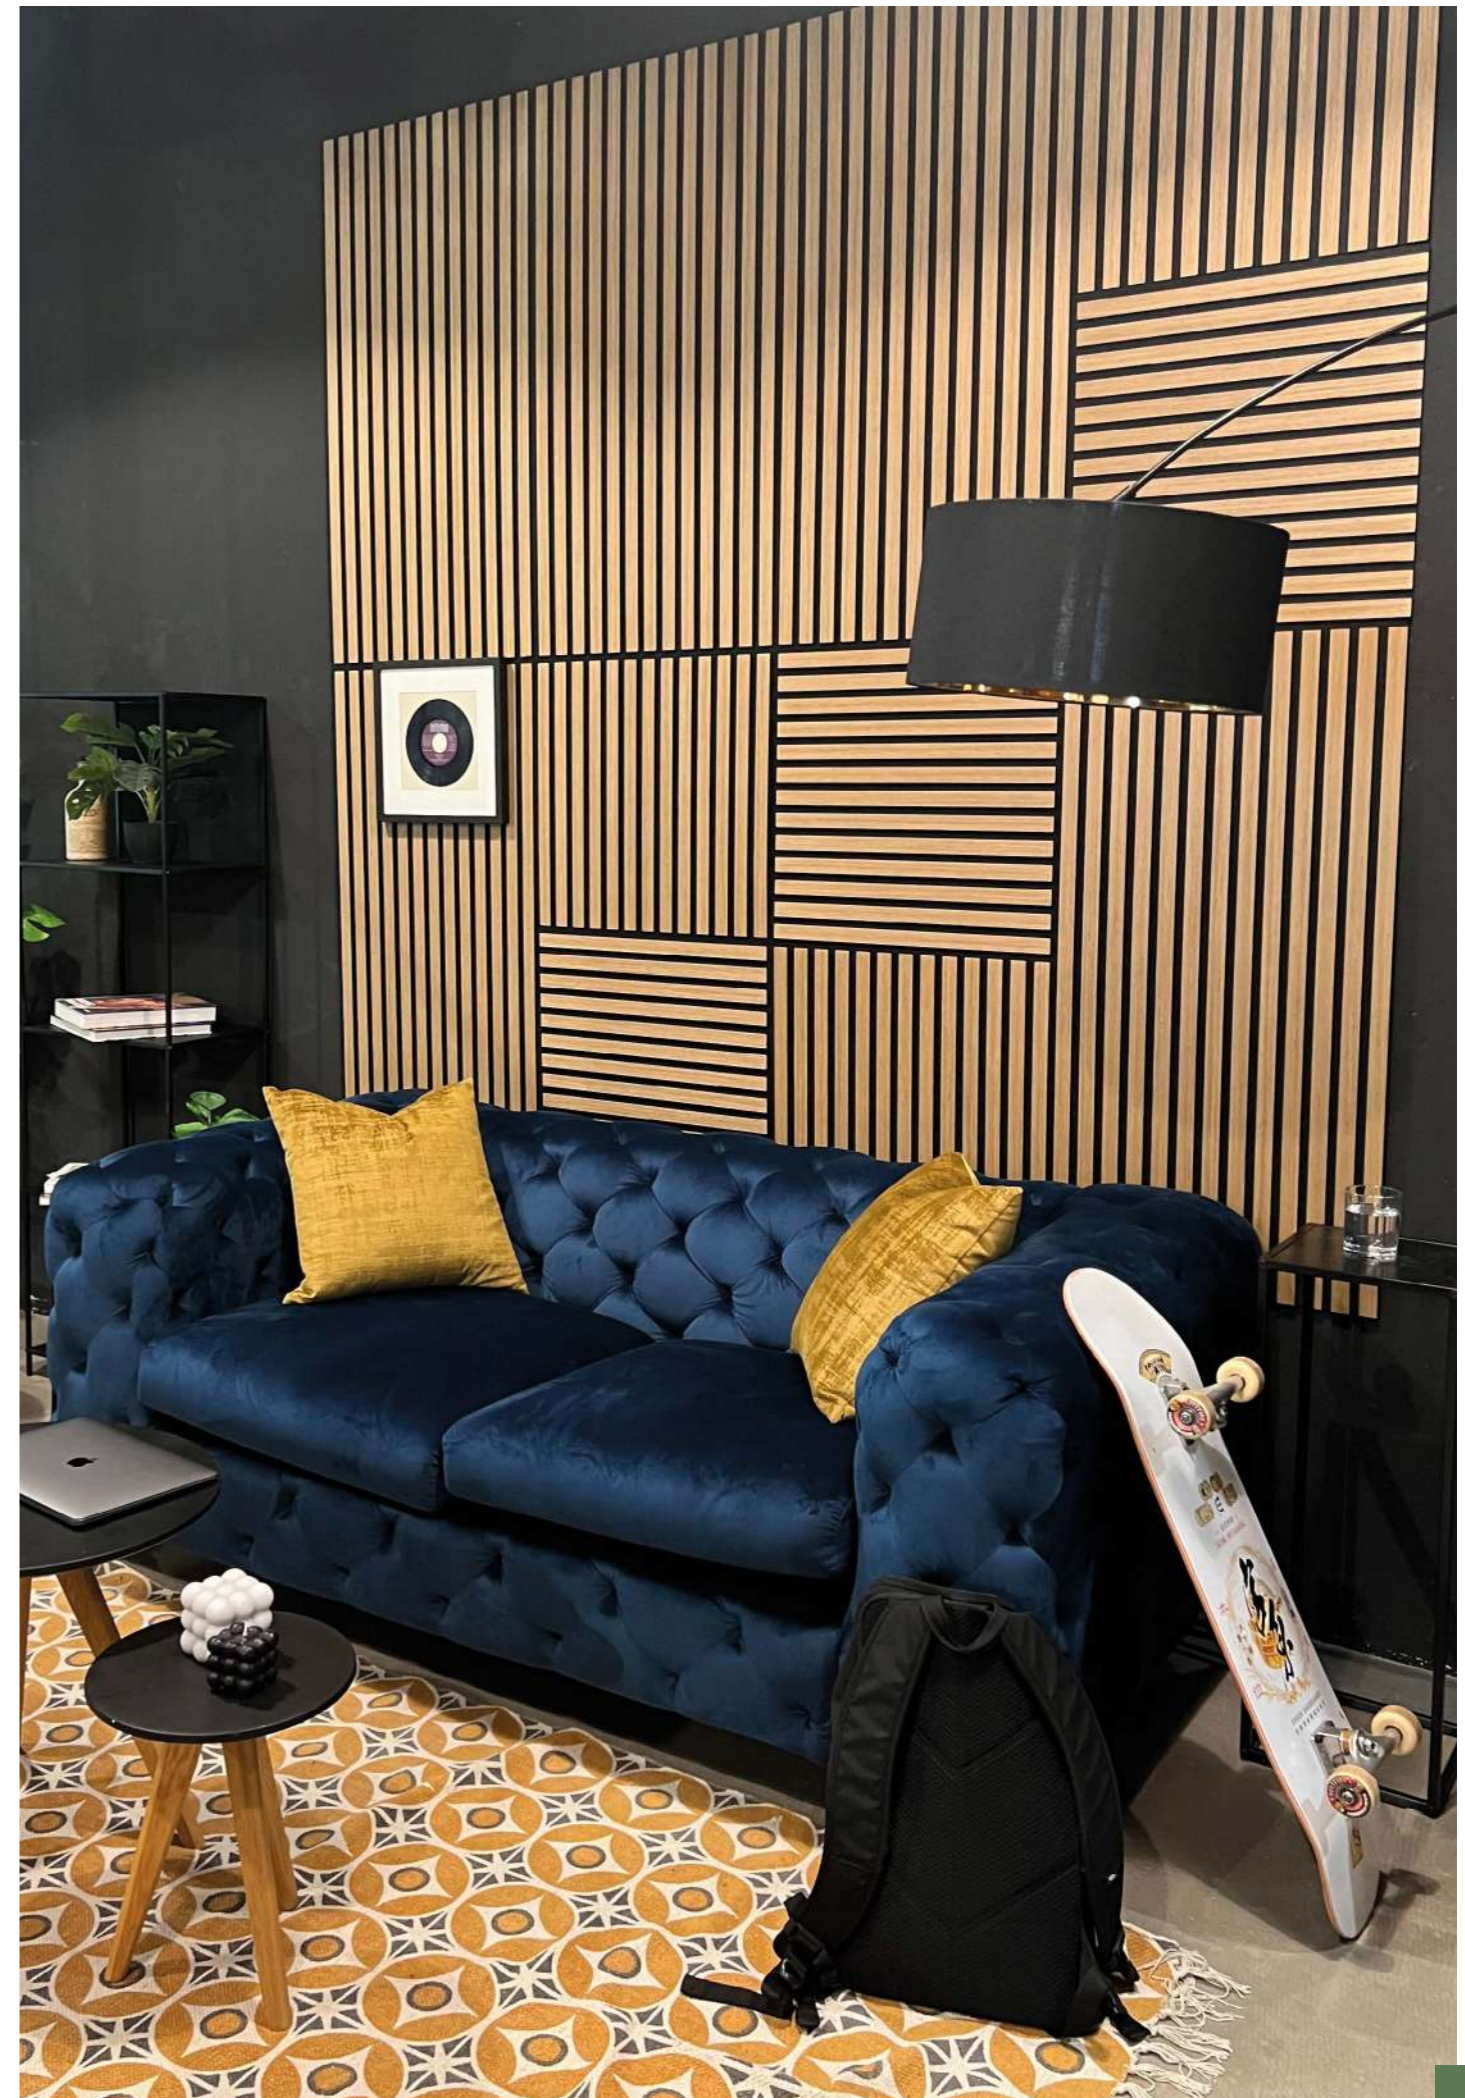

Individual design and customization

Whether as a large-scale wall or ceiling covering or as a stylish and decorative element - the acoustic panels from JANGAL can be designed and installed according to your own ideas.

Increase of the sense of well-being

Noise in homes affects health and often leads to difficulty concentrating and problems with speech intelligibility. Our acoustic panels eliminate these problems and optimize the health of the home.

The connector with a „wow“ effect

Compared to other products, the acoustic panels from JANGAL have a special feature: the specially developed connector allows installation over the entire height of the wall without visually disturbing joints. This makes seamless transitions possible, resulting in an aesthetically pleasing overall appearance. A combination of vertically and horizontally mounted panels is also possible, which offers infinite freedom in design.

Design registered EU-wide.

The system is protected by utility model in Germany.

A European patent is pending for the system and method of arrangement.

CONNECTOR

Unsightly joints from „wood on wood“ are a thing of the past.

Smart Acoustic Panel

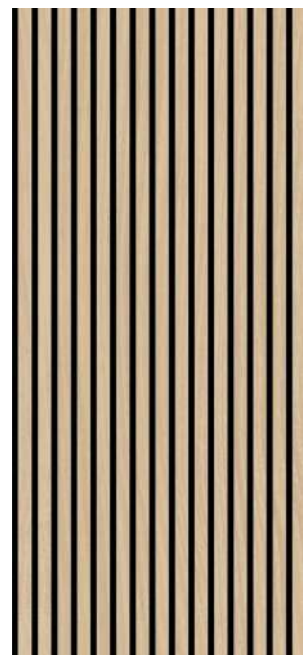

Product structure **Germany-wide** protected by utility mode.

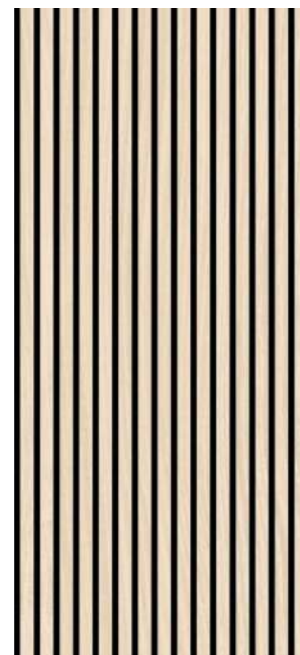

A European patent is pending for product structure.

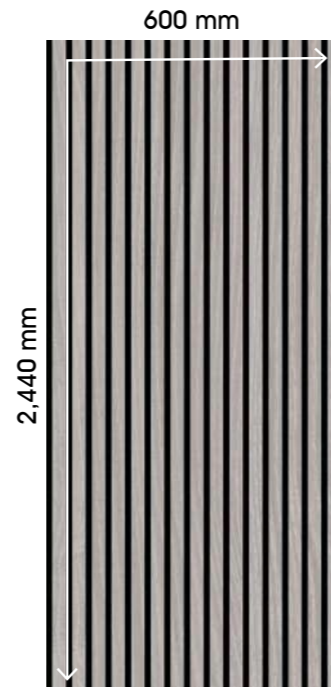

FORMAT 2,440 x 600 x 10 mm

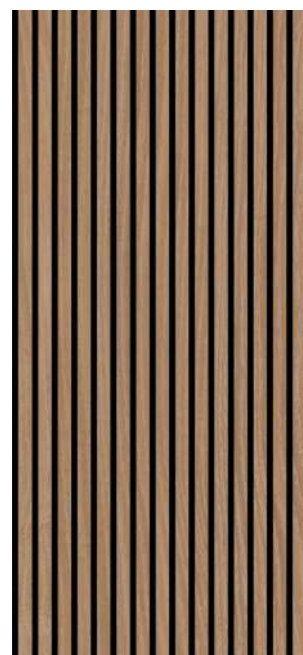

10004 Light Oak

10005 Classic Oak

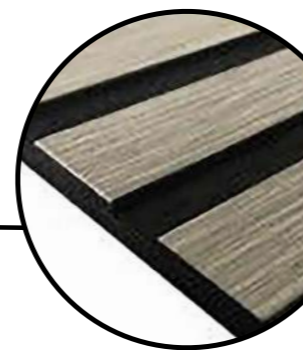

10006 Grey Oak

10007 Oiled Oak

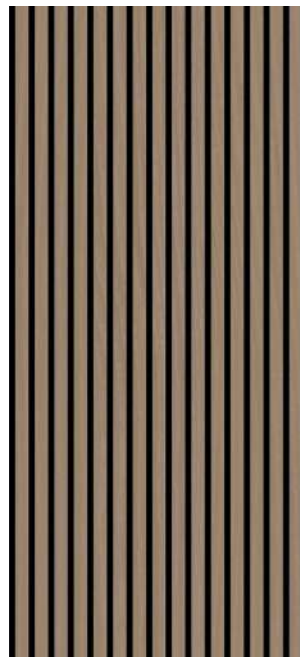

Smart Acoustic Panel is a stylish design element for every room. It is characterized by a height of only 10 mm, which allows the panel to be mounted on walls and ceilings in no time. And all this without making any sacrifices in appearance as well as function. Thanks to the format of 2,440 x 600 mm, walls and ceilings can be visually upgraded in a short time.

Real wood 1 mm
PET felt 9 mm

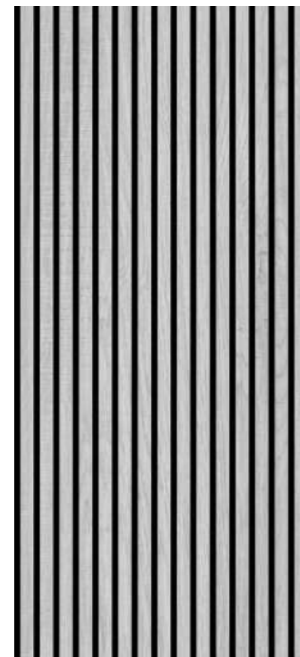

Solid Acoustic Panel

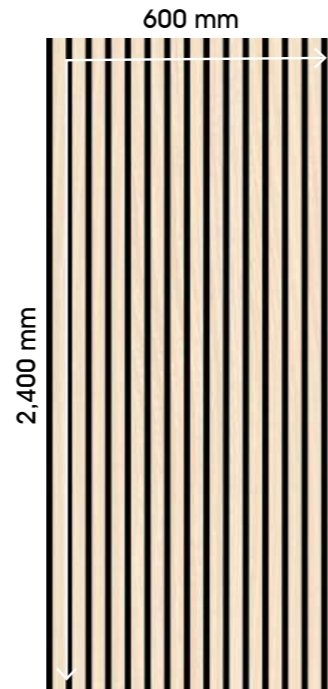

FORMAT 2,400 x 600 x 22 mm

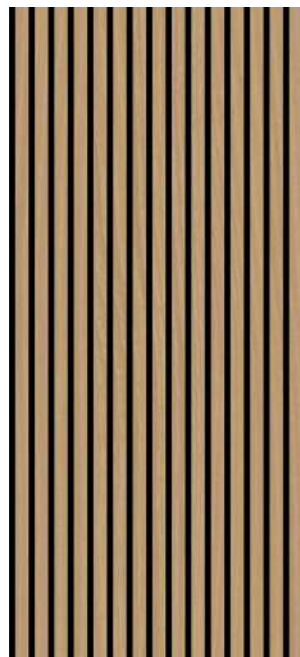

10000 Walnut

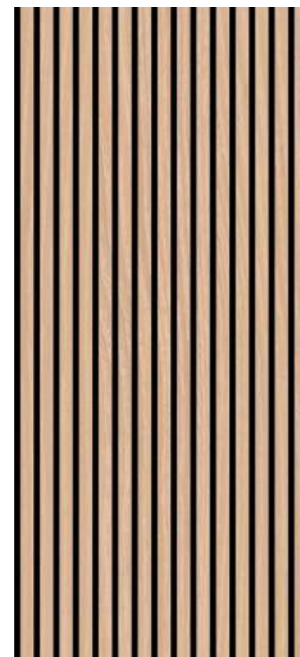

10001 Silver Oak

10002 Nature Oak

10003 Teak

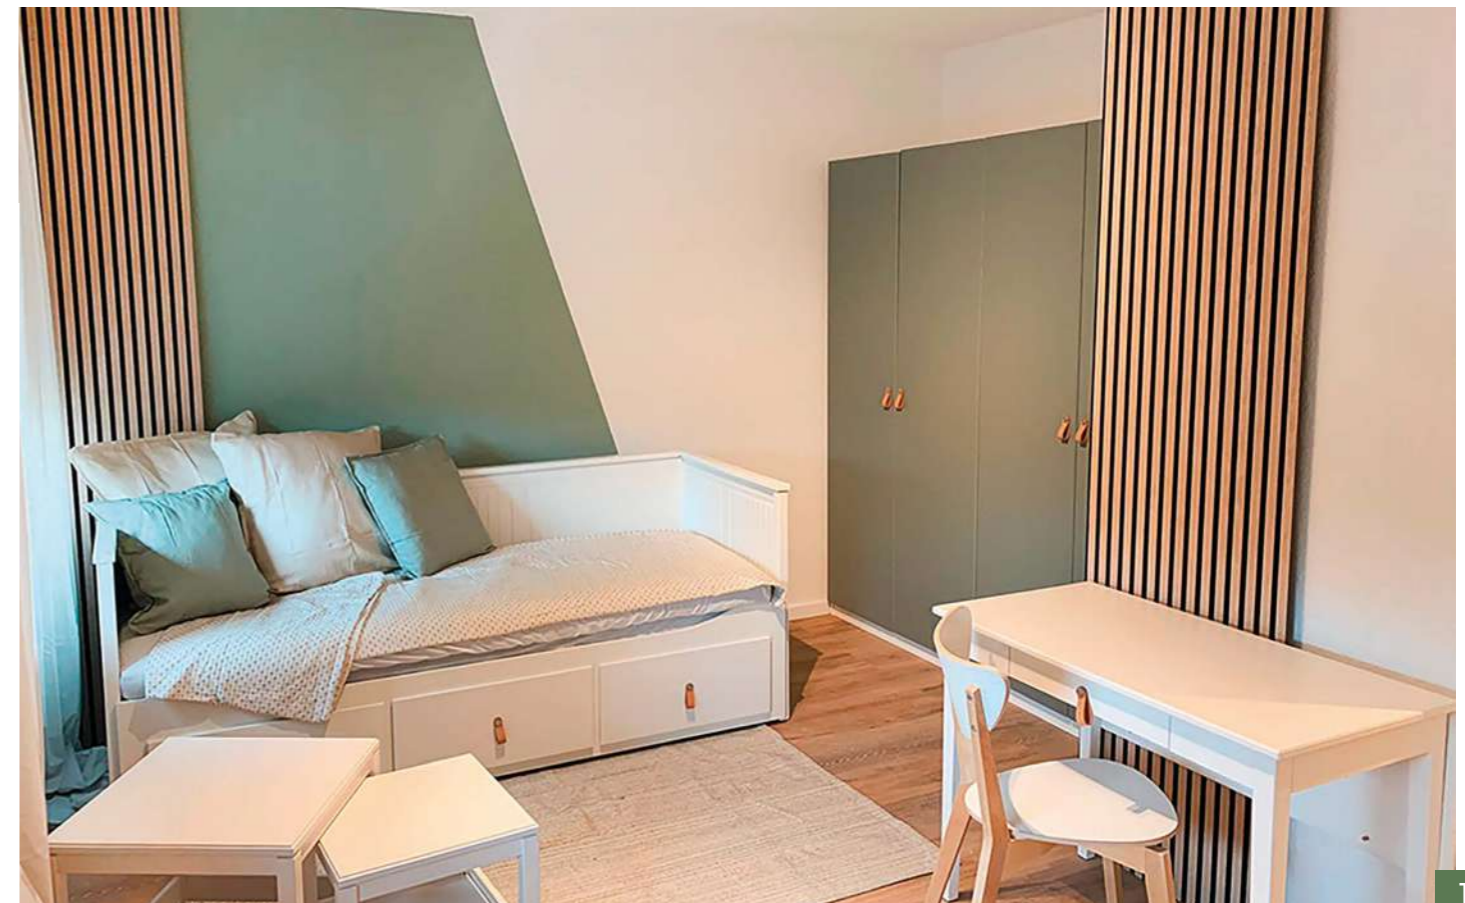

10012 Classic Oak

Real wood 1 mm
MDF 12 mm
PET felt 9 mm

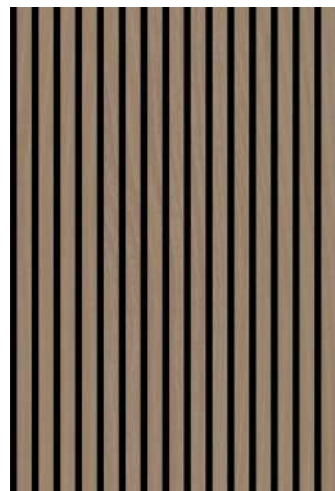

The Solid Acoustic Panel in the 2,400 x 600 mm format relies on the combination of wood and felt. The high-quality MDF slats are applied to the 9 mm thick sound-absorbing felt. Because of the depth, these can absorb the sound even better.

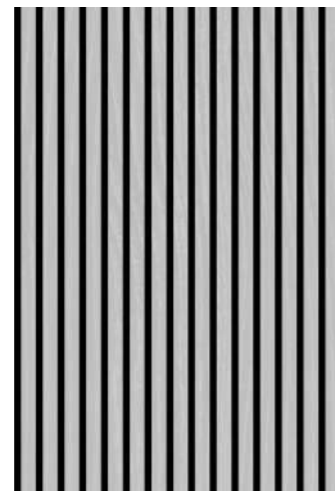

Solid Acoustic Panel

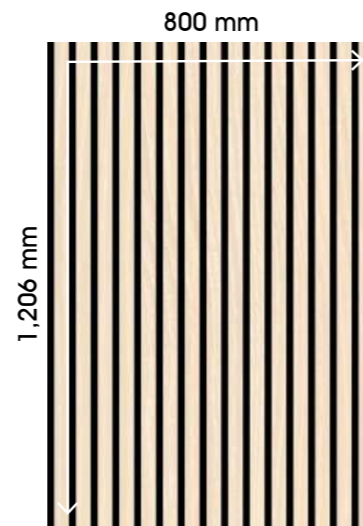

FORMAT 1,206 x 800 x 22 mm

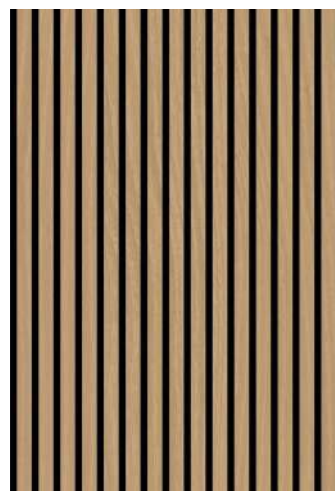

10013 Walnut

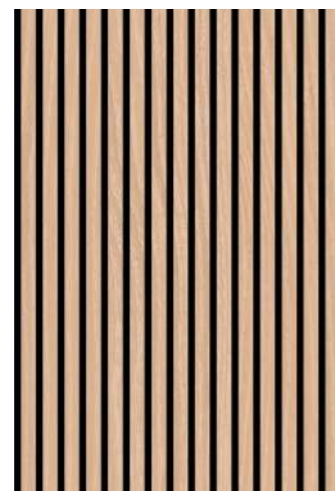

10014 Silver Oak

10015 Nature Oak

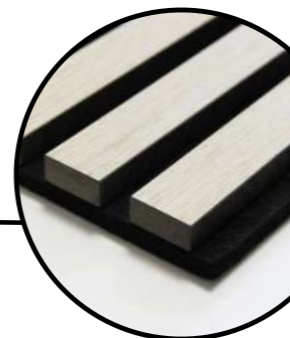

10016 Teak

10017 Classic Oak

Real wood 1 mm
MDF 12 mm
PET felt 9 mm

The new Solid Acoustic Panel made of high-quality MDF slats impresses with its practical format. With a size of 1,206 x 800 mm, the panels are easier to handle and even more creative in design. Even lower room elements such as kitchen counters can be designed without much sawing effort.

No joints visible due to connection with the connector

FURTHER THOUGHT

MODULAR WALL

The modern and refined solution to create a design.

With JANGAL Modular Wall, the wall can be designed entirely according to your own wishes and ideas.

The formats and colors available from this series allow flexibility and freedom in interior design. These can be mounted vertically or horizontally, depending on personal taste, in any formation and based on individual circumstances. Therefore, nothing stands in the way of creativity.

With the help of the connector, seamless transitions are possible, resulting in an aesthetically pleasing overall picture.

“Combination of different panel sizes possible for the first time.”

Modular Wall

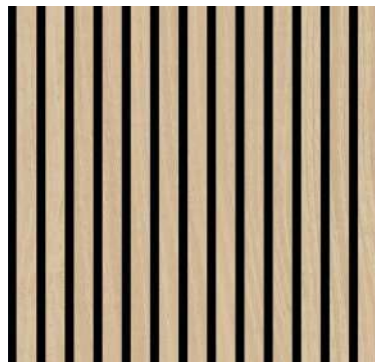

Product structure Germany-wide protected by utility mode.

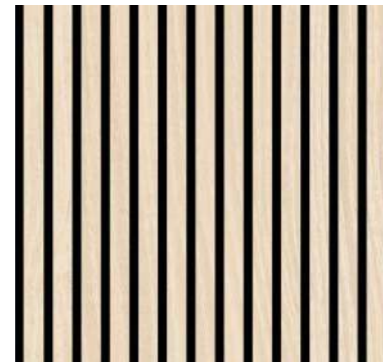

A European patent is pending for product structure.

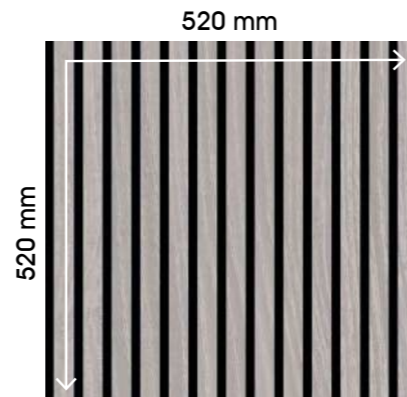

FORMAT 520 x 520 x 10 mm

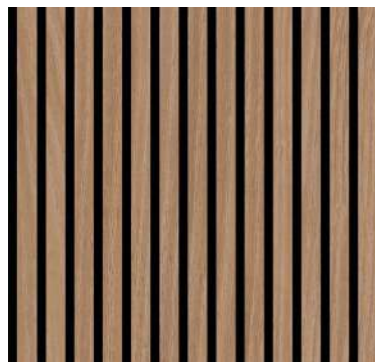

11000A Fanal Oak

11001A Letea Oak

11002A Oulanka Oak

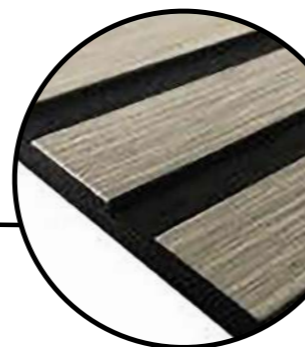

11003A Davert Oak

The Modular Wall panel in 520 x 520 mm format is convincing due to its square format, because it looks less like a sound absorber and more like a work of art. Due to the practical size and light weight, the acoustic panel becomes a flexible design element and offers countless design possibilities. In combination with the 1,040 x 520 mm format, creativity is limitless. Installation is extremely simple, as the panel only has a height of 10 mm.

GERMAN DESIGN AWARD WINNER 2024

Real wood 1 mm
PET felt 9 mm

Unique possibility to change the direction of the panels in the surface.

No joints visible due to connection with the connector

Modular Wall
