# NATURE, YOU CAN FEEL...

## Laminate by JANGAL

### THE NATURAL PRODUCT

Our laminate flooring products are all made with nature in mind. Thanks to the advanced production techniques and the use of renewable wood materials you can be safe in the knowledge you are laying an environmentally friendly product in your home.

Our floors are produced in Germany and Austria and consist of almost 100 % natural raw materials. Domestic timber is used exclusively for the production of the wood fibre boards which are the basis of the floors. Our superb selection of decors and designs is graphically reproduced true to nature using the most modern technology. So that no tree

in the rain forests of Asia or South America has to be cut down.

With our floors we offer you the opportunity to make your rooms attractive and homely in a sustainable way.

### THE PRODUCT RANGE

Our JANGAL range includes more than 40 decors named after indigenous people, national parks, islands and mountains. The floors differ in their characteristics such as synchronous embossing, groove and plank format and their thickness from 7 mm to 12 mm.

Manufacturer  
is a member of  
the EPLF

# NATIONAL PARK LINE

National parks protect special areas, landscapes and their animal richness in this world. They are characterized by a unique, undisturbed landscape, wilderness and natural abundance of species. In the „JANGAL National Park Line“ we present unique laminate floors in plank and wide plank formats inspired by the great natural diversity. Visually, the floors impress with their circumferential groove (4V-groove), which makes the planks look even more natural.

The National Park Line Ultimate floors are a special highlight of the collection. With their synchronous surface they create the impression of a real wooden floor. Thanks to a utilisation class of 32, the decors can be used in the medium commercial sector.

# ISLAND LINE

Small and large islands belong to every continent of this world, which are either inhabited by humans and animals alike or simply offer special natural sights and provide a home for rare animal species. Like the islands, the floors of the „JANGAL Island Line“ have their own special character. With a product thickness of 10 mm, they are robust and durable.

The decors in plank and wide plank format impress with their all-round 4V-groove as well as naturally tactile surface, which runs synchronously with the wood grain. The use in commercial areas with heavy traffic is no problem due to the utilisation class of 33.

# STATE PARK LINE

A „state park“ is a landscape in the U.S. that is particularly worthy of protection. They resemble national parks, but are usually smaller and consequently less famous. The „JANGAL State Park Line“ is dedicated to these.

With a thickness of 12 mm, these decors are among the most stable designs. Due to their robustness and thickness, the floor shows little signs of wear and a particularly strong click connection, making it suitable for intensive commercial use (utilisation class of 33). The decors are available with 4V-groove. The State Park Line Pro also stands out for its synchronous surface structure.

# STONE LINE

Created over thousands of years and as multifaceted as our soils: the rocks of this world on which we build our lives. Inspired by nature, the „JANGAL Stone Line“ presents highly impressive decors. The floors are 8 mm thick and the ideal flooring for those who are looking for something special.

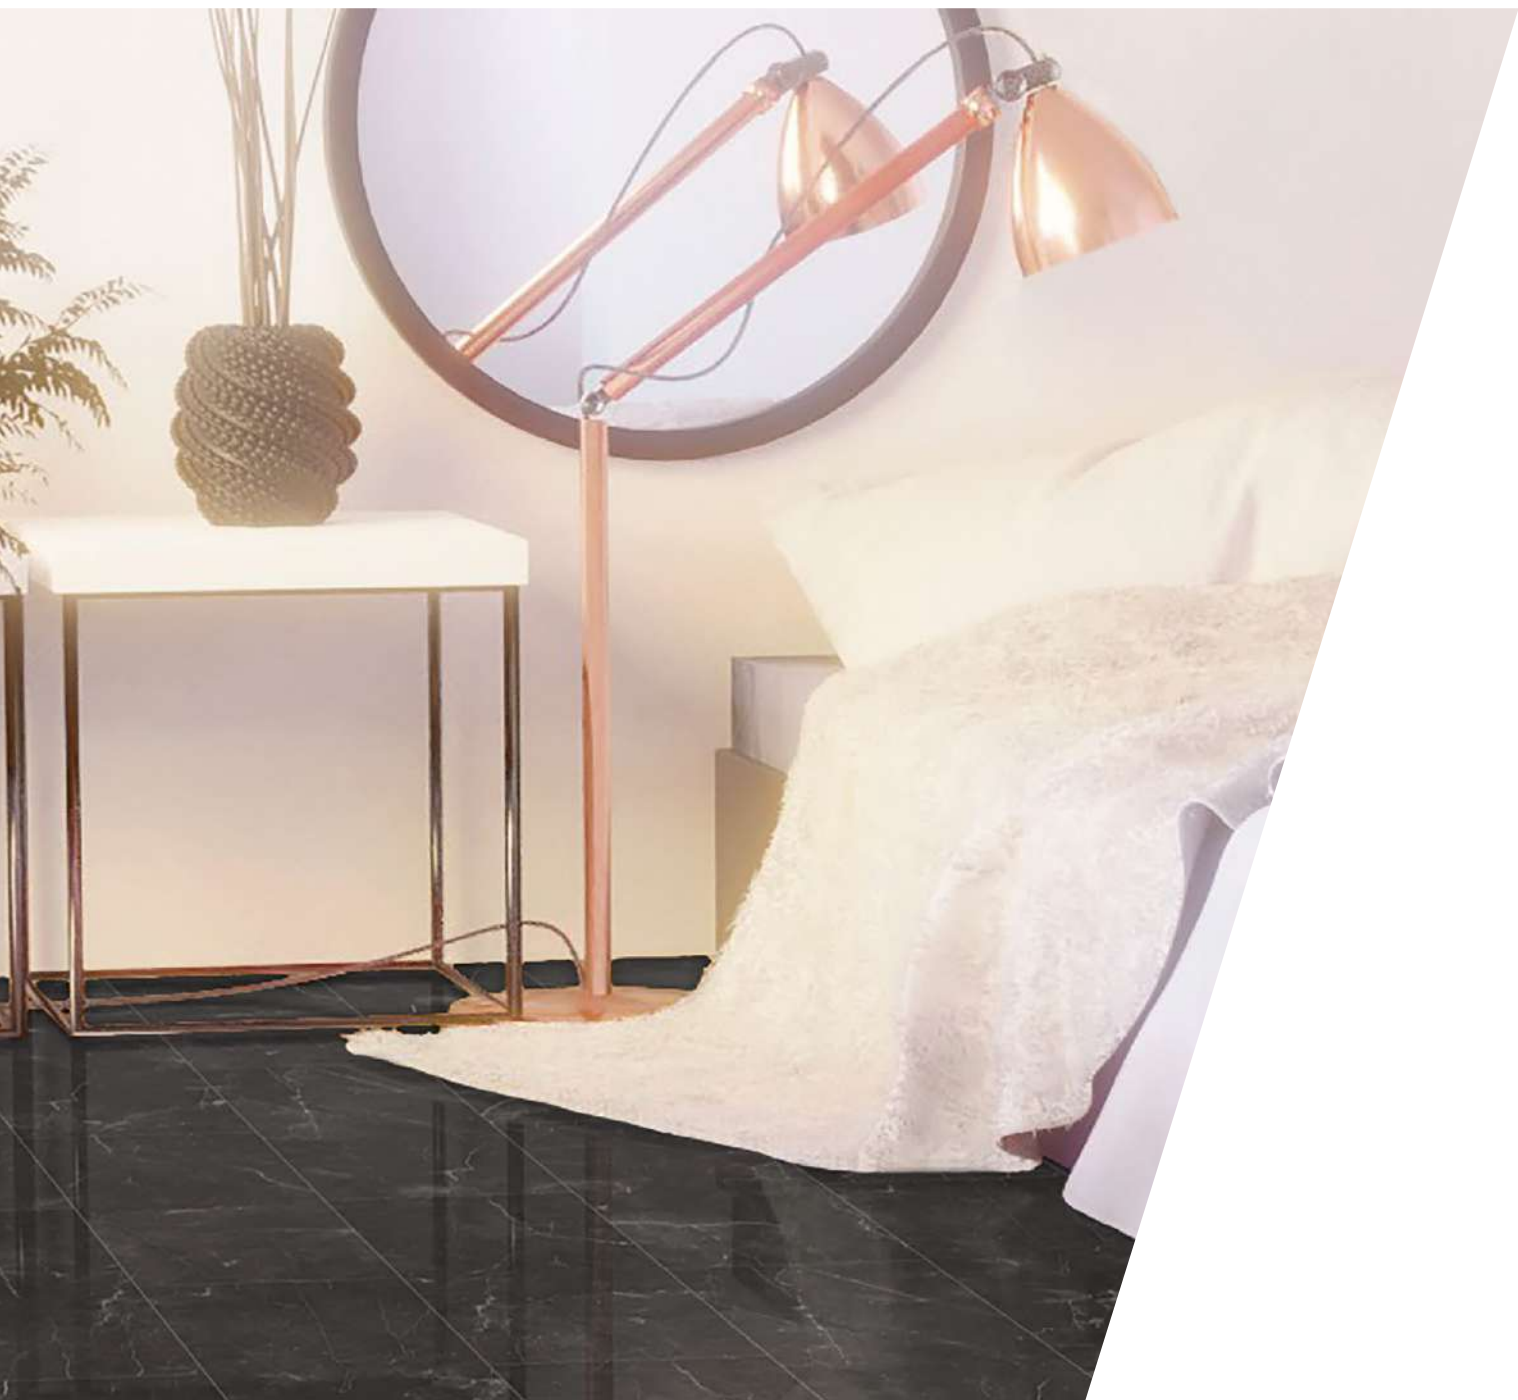

The high-gloss look perfectly suits any interior style, turning any room into a real eye-catcher. With an abrasion class of 4, the floors are also very hard-wearing, so that even heavier use does not cause any problems.

### 4V-GROOVE

With a circumferential groove along the long and short edges, the result is an installation pattern with the charm and elegance of a genuine wooden plank floor, as each individual plank is accentuated.

### SYNCHRONOUSLY EMBOSSED SURFACE

To enhance the authenticity, synchronous embossing is utilised to create a textured surface that emulates the natural look and touch of real wood and matches the design.

## CLICK-CONNECTIONS

### EASY-CLICK

With the Easy-Click connection, each plank can be laid individually. The planks are angled at the long sides and locked at the short sides by lightly pressing them in.

### ONE-CLICK

With this click connection, a row is first created across the entire width of the room by clicking on the front side. The next row is clicked lengthways into the groove profile of the previous row. To lock, the plank is angled downwards and snapped into place with pressure from above until an audible click is heard.

### LOC-CLICK

With the Loc-Click connection, a row is first created over the entire width of the room by clicking on the front. The planks of the second row are not yet connected to the longitudinal side of the first row. Only after the planks of the second row are connected on the front side is the tongue of the second row connected to the groove of the first row by lifting slightly.

The click connections are ideally suited for floating installation on your own. Detailed installation instructions can be found on the insert or the back of each box, at [jungal.eu](http://jungal.eu) or as videos on our YouTube channel.

# »EQUIPPED«

## FOR A PERFECT FINISHING TOUCH...

To make sure that you enjoy your new floor for a longer period of time, it is very important to choose the right accessories. The "EQUIPPED" brand offers a wide range of impact sound underlays, baseboards, clip systems and corners. The impact sound range comprises of nine different insulation underlays for laminate floors, available in thicknesses from 1.8 mm to 4 mm.

Likewise, each JANGAL floor is available with a matching decor or white (paintable) baseboard, which offers the possibility to let a cable disappear behind it. Completed with end caps on projections or door frames as well as connectors and internal corners, this range offers everything needed in completing the installation.

SKIRTING REMARKS

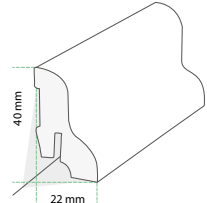

In addition to the matching EQUIPPED strips with the same decor, 58 mm high and 2400 mm long, there are other white strips in the following formats:
